The 10th Annual Gilbert Dreyfuss High School Open

2027 The Gibby Tournament

Local Rules

Most local rules are listed on the reverse side of our official LCFCC scorecards, but here are some additions and clarifications of our local rules:

- Holes **10** and **18** have adjacent fairways separated by a lateral hazard defined by red stakes; for safety, you may not play a ball from the fairway of the adjacent hole if your ball crossed the hazard. You must proceed under lateral hazard rule.

- Hole **11** has a drop zone in front of the greenside bunker. This drop zone is intended for shots that cross over any portion of the green or end up on the cart path adjacent to the green. Left side of fairway is hazard marked with red stakes and the right side is OB marked with white stakes that requires a retee if applicable.

- Holes **12** and **13** have adjacent fairways separated by a lateral hazard defined by red stakes; for safety and pace of play, you may not play a ball from the fairway of the adjacent hole if your ball crossed the hazard. You must proceed under lateral hazard rule.

- Hole **12** has an elevated tee box for the men's tees and red penalty areas on both sides of the fairway. If your ball does not reach the fairway or cross a part of it, you **must** re-tee. If a ball crosses the fairway, but players cannot agree where the shot crossed, there is a drop circle in the rough before the start of the fairway that can be used with a one stroke penalty. The view from the tee of the penalty area on the right side of the fairway is partially blocked, making it sometimes difficult to determine where a ball entered the penalty area; this is when the drop circle comes into play.

- Hole **14**: If your ball does not reach the fairway, it **must** be re-teed.

- Hole **18** has OB on the right of the fairway and red penalty area on the left of the fairway. Your tee shot **must** clear the canyon. If it does not clear, you will re-tee.

Embedded ball rule in effect for general playing area (excluding bunkers). In taking relief, the player drops the original ball within one club-length of (but not nearer to the hole).

Important: Embedded ball rule only applies if all players agree that the ball was headed toward the current fairway, not an adjacent hole. If a ball is lost, but deemed to be embedded in the fairway on your current hole, all players in your group must agree on the location in which the ball is to be placed.

**Ground under repair is marked by roped off areas and white markings in the general playing area.
